

Mathematics Colloquium

Elliptic Fibrations in String Theory and Hyperplane Arrangements

Jonathan Mboyo Esole (Harvard)

Abstract

I will discuss recent developments in theory of elliptic fibrations and how they interact with interesting questions in representation theory, topology, incidence geometry, combinatorics, and physics.

Thursday, 28 January 2016, 4pm

Smith Hall 204

Tea and refreshments will be served at 3:45pm.
